Your First Source for Energy Savings

FirstEnergy Whole House Program

Learn how to reduce energy costs and increase the comfort and efficiency of your home with the Whole House Program for customers of Met-Ed, Penelec and Penn Power, FirstEnergy's Pennsylvania utilities (FirstEnergy). The Whole House Program will help you identify energy efficiency improvements that may qualify you for up to **\$1,200** in total rebates.

- Up to **\$300*** in rebates for participating in a two-part comprehensive home energy audit, and
- Up to **\$900**** in rebates for installing energy-saving improvements such as:
 - Air sealing
 - Duct sealing
 - Insulation
 - Duct insulation
 - Windows and doors

**\$150 rebate for the test-in audit and \$150 rebate for the test-out performance audit after energy-saving measures have been installed*

***Based on \$.30/KWh savings achieved from installed improvements, up to \$900 maximum.*

Step 1: Get a Home Energy Audit and a Rebate

Start with a home energy audit performed by a BPI-certified expert who will work with you one-on-one to identify energy-saving improvements. The expert will evaluate your home's heating and cooling systems, insulation, windows and doors and conduct a blower door test to detect air leaks that could be costing you money.

The home energy expert also may install energy-saving products at no cost* to you. Products may include:

- Compact fluorescent light (CFL) bulbs
- LED nightlights
- Energy-saving surge protectors
- Water heater tank wraps
- Water heater pipe insulation
- Energy-efficient showerheads
- Kitchen faucet aerators
- Bathroom faucet aerators

Click here to find a [home energy expert](#) in your area.

Step 2: Make Recommended Energy-Saving Improvements

After the audit, the home energy expert will provide you with a comprehensive report and recommend improvements to increase your home's energy efficiency. You decide which improvements to implement.

Step 3: Receive Additional Savings – Up to \$900 More!

The final step of the Whole House Program includes additional testing that will be compared to the results of the initial audit. This testing will measure the kWh savings achieved by installing the energy-saving improvements you have chosen.
